

AYHM MOHAMMED OBEIDAT

Amman, Jordan | +962 788234055 | ayhmobeidat.cs@gmail.com | github.com/ayhm325

PROFESSIONAL SUMMARY

Computer Science graduate from Jordan University of Science and Technology (JUST) with hands-on experience developing C# and .NET applications using WPF, Entity Framework Core, SQL Server, and LINQ. Experienced with Object-Oriented Programming, MVVM, layered architecture, Dependency Injection, Repository Pattern, Service Layer, DTOs, and SOLID principles. Seeking an entry-level Software Engineer or Junior .NET Developer position.

EDUCATION

Jordan University of Science and Technology (JUST) — Irbid, Jordan | 2026

Bachelor's Degree in Computer Science

TECHNICAL SKILLS

Programming Languages: C#, C++, Python, SQL

.NET & Development: .NET, WPF, Entity Framework Core, LINQ, MVVM, OOP, Data Structures & Algorithms, Debugging

Architecture & Design: Layered Architecture, SOLID Principles, Dependency Injection, Repository Pattern, Service Layer, DTOs, Result Pattern, Separation of Concerns

Database: SQL Server, SQL Queries, JOINS, GROUP BY, Subqueries, Database Design, Entity Relationships

Tools: Git, GitHub, Visual Studio, VS Code, SQL Server Management Studio (SSMS)

PROJECTS

DVLD — Driving & Vehicle License Department System | C# | .NET | WPF | MVVM | EF Core | SQL Server | LINQ | DI

- Developed a multi-layered WPF desktop application for managing driving license and vehicle-related processes using C# and .NET.
- Applied MVVM architecture and layered architecture with separate Domain, Application, Infrastructure, and Presentation layers.
- Implemented Dependency Injection to decouple ViewModels, Services, and Repositories and improve maintainability and testability.
- Applied the Repository Pattern and Service Layer to separate data access from business logic.
- Used Entity Framework Core and LINQ for database access, querying, entity relationships, and CRUD operations.
- Implemented DTOs and the Result Pattern to separate data transfer from domain entities and provide consistent operation result handling.
- Developed business workflows including license applications, test appointments, license issuance, renewal, detention and release, and international licenses.
- Used SQL Server and EF Core Fluent API for data persistence and entity relationship configuration, with Git/GitHub for version control.

PROBLEM SOLVING

- Regularly practice programming challenges and algorithmic problem solving.
- Familiar with arrays, linked lists, stacks, queues, trees, recursion, and fundamental algorithms.
- Apply analytical thinking and debugging techniques to identify and resolve programming issues.

LANGUAGES

Arabic: Native | English: Intermediate
