Ayhm Mohammed Obeidat

.NET Backend Developer

Amman, Jordan | +962 788 234 055 | ayhmobeidat.cs@gmail.com

GitHub | Portfolio

Profile

Computer Science graduate from **Jordan University of Science and Technology (JUST)** with a strong foundation in C# and .NET development. Practical experience with **ASP.NET Core Web API**, Entity Framework Core, SQL Server, REST APIs, JWT authentication, and automated testing. Strong understanding of layered architecture, SOLID principles, Dependency Injection, and transactional workflows. Seeking a Junior .NET Backend Developer or Junior Software Engineer position.

Projects

DVLD – Driving & Vehicle License Department System *GitHub Repository*

C# — .NET — ASP.NET Core Web API — EF Core — SQL Server — WPF — JWT — xUnit

- Developed a multi-layered driving license management system using separate Domain, Application, Infrastructure, API, and Presentation layers.
- Built an ASP.NET Core Web API exposing application functionality through RESTful endpoints while separating API, business logic, and data-access responsibilities.
- Applied Dependency Injection, Repository, Service Layer, and Unit of Work patterns to improve separation of concerns and transactional consistency.
- Used Entity Framework Core and SQL Server for persistence, entity relationships, CRUD operations, and LINQ-based queries.
- Implemented JWT authentication and role-based authorization to protect API endpoints.
- Added centralized API error handling using global exception handling, the Result Pattern, and Problem Details responses.
- Implemented login rate limiting to restrict repeated authentication attempts and return HTTP 429 when configured limits are exceeded.
- Developed unit and integration tests covering application logic, API behavior, infrastructure operations, authentication, and security-related scenarios.
- Implemented business workflows for license applications, test appointments, license issuance, renewal, replacement, detention and release, and international licenses.
- Used Git and GitHub for version control and maintained an Azure DevOps pipeline for automated restore and build operations.

Education

Jordan University of Science and Technology (JUST) Irbid, Jordan

B.Sc. in Computer Science *2026*

Skills & Knowledge

Programming: C#, SQL
Backend: .NET, ASP.NET Core Web API, Entity Framework Core, LINQ, REST APIs
Architecture: Layered Architecture, SOLID Principles, Dependency Injection, Repository Pattern, Unit of Work, Service Layer, DTOs, Result Pattern, Separation of Concerns
Security & API: JWT Authentication, Role-Based Authorization, Rate Limiting, Global Exception Handling, Problem Details, Swagger/OpenAPI
Databases: SQL Server, SQL Queries, JOINs, GROUP BY, Subqueries, Database Design, Entity Relationships
Testing: xUnit, Unit Testing, Integration Testing, Moq
Desktop: WPF, MVVM
Tools: Git, GitHub, Visual Studio, VS Code, SQL Server Management Studio (SSMS), Azure DevOps

Languages

Arabic (Native) English (Professional Working Proficiency)
